

STIX Release Notes

This document provides a high-level summary of the changes between STIX 1.0 and STIX 1.0.1.

Bug Fixes

This section describes functional bug fixes in 1.0.1.

- **#16: The STIX MAEC 4.0 Extension Points to the Wrong Schema.** The extension had a deprecated schema import location so while it technically worked, it should have pointed to a different location. This has been corrected by pointing the new MAEC extension to the correct location for 4.0.1. As part of the same process, the MAEC schemas will now be available in the local STIX 1.0.1 release package (it was not included in the local STIX 1.0 release package).
- **#33: MotivationEnum-1.0 Typo.** Corrects a typo in the Motivation vocabulary by creating a correct vocabulary (MotivationEnum-1.0.1 and MotivationVocab-1.0.1) and deprecating the previous version.
- **#34: Planning AndOperationalSupportEnum-1.0 Typo.** Corrects a typo in the Planning and Operational Support vocabulary by creating a corrected vocabulary (PlanningAndOperationalSupportEnum-1.0.1 and PlanningAndOperationalSupportVocab-1.0.1) and deprecating the previous versions.
- **#51: Remove default version number from STIX package and components.** This prevents schema-aware consumers from assuming incorrect versions of STIX content. Additionally, the version enumeration for all STIX content was updated to include the appropriate update version.

Enhancements

This section describes feature enhancements or additions to the schema in 1.0.1.

- **#48: Upgrade to CybOX 2.0.1.** The imports of CybOX within STIX were upgraded to CybOX 2.0.1 in order to take advantage of critical bug fixes in that version.
- **#49: Upgrade CAPEC extension to 2.6.1.** In order to align versions of CybOX, the CAPEC extension was upgraded to CAPEC 2.6.1.
- **#50: Upgrade MAEC extension to 4.0.1.** In order to align versions of CybOX, the MAEC extension was upgraded to MAEC 4.0.1.

Documentation

This section describes non-functional changes to documentation in 1.0.1.

- **#35: STIX Incident typo in annotation for the Time field.** This corrects a misspelling in the annotations for IncidentType/Time.
